Shiatsu

50min \$160 80min \$220

Specialty Therapies

Hawaiian Bodywork

80min \$240

Using hands and forearms and specially selected music, the hypnotic rhythm of this massage brings about a deep sense of relaxation. Feel yourself soften as your therapist performs a 'dance with the body', intuitively flowing from head to toe. Though it is best to be unclothed for this treatment, your therapist will maintain a draped sarong to protect your modesty. Ideal for shifting tension from the physical, energetic or emotional bodies.

Thai Massage

80min \$220

This fully clothed massage is performed on a futon and uses acupressure muscle compression and a supported stretching regime to stimulate your meridian channels. Aligning your structure and sending abundant energy flow along the neural pathways, it is useful for releasing both joint and muscle tension whilst also leaving you energised, balanced and relaxed. Thai massage can be strong and deep or soft and nurturing to suit your needs. Please note, Thai pyjamas are provided for your comfort.

MyBodyWorks

80min \$240

Combining Myotherapy and physiotherapy techniques, this innovative, holistic and restorative treatment combines stretching and musculoskeletal massage. By moving the muscle into a gentle stretch, the deeper muscles, ligaments and tendons are drawn to the surface allowing for a deeper release in tension. Your therapist works along the muscle from origin to insertion to lengthen and realign the entire body. Tailored to address your individual condition, this is ideal for chronic complaints such as muscle tightness, frozen shoulder, tennis elbow, whiplash, neck and back pain, sciatica, headaches and sports injuries.

Reiki Healing

50min \$160

Reiki is a hands-on energy healing treatment different to massage. Your therapist channels energy into your body to assist the rebalance of your mental, physical, emotional and spiritual bodies. Reiki often results in feeling more light, relaxed and centred and can help with a host of issues including aiding the detoxification process, assisting with insomnia and relieving stress.

Eastern Therapies

Eastern medicine has been used for thousands of years to address many physical, mental and emotional imbalances. Research shows that Traditional Chinese Medicine (TCM) and acupuncture help to activate the parasympathetic nervous system and draw the body out of a 'fight or flight' response. Based on Eastern healing techniques, these treatments can be effective in treating anxiety, stress, persistent muscular tension or challenges such as headaches, digestive disorders, hormonal imbalances, fertility and disrupted sleep patterns.

TCM and Acupuncture

50min \$165 80min \$240

This treatment begins with a consultation to gather relevant information from your health history and gain further understanding of your body's current condition by inspecting your pulses, eyes and tongue. Based on this information and your desired outcome, acupuncture is utilised to clear blockages, encourage normal flow of Qi and address any muscular tension.

East and West

80min \$250

A fusion of techniques delivers a potent treatment for the relief of stress and tension. Your practitioner softens tight muscles with massage before applying the cupping technique to release stubborn knots, drain toxins and bring blood flow to stagnant muscles. Acupuncture re-establishes a balanced flow of energy throughout the body, while moxibustion strengthens blood and stimulates Qi. Ideal for anyone with persistent muscular pain.

Eastern Harmony

50min \$180

There are many acupressure points around the face and scalp that retain tension and stress. Allow your therapist to alleviate the tension held in your facial muscles, scalp, neck and shoulders with a combination of acupuncture and massage. Find true relief from headaches, clenched jaw and teeth grinding, sinusitis, sore eyes or a busy mind.

Chi Nei Tsang

50min \$170

Translating to 'internal organs energy transformation', this treatment works mainly on the abdomen with deep, soft and gentle touches that are designed to teach your internal organs to work more efficiently. Unprocessed emotional charges are also treated in the same manner, along with all of the body systems: digestive, respiratory, cardiovascular, lymphatic, nervous, endocrine, urinary, reproductive, muscular-skeletal and the acupuncture meridian system. Ideal for those who are experiencing digestive complaints and for those looking to rebalance their body systems. We recommend combining with Colonic Hydrotherapy.

Zero Balancing

45min \$160

Combining principles of osteopathy with Traditional Chinese Medicine, Zero Balancing is hands-on acupressure bodywork, which unblocks and rebalances your body's structure and energy field. This session aligns the skeleton (without force or pain) to improve your posture and gait and leaves your deepest anatomy relaxed, comfortable and loose.

Stress and Emotional Wellbeing

Through scientific research, we now know that our thought processes and emotional state have a direct impact on our wellbeing. Build a deeper awareness of your inner resources to help you process challenging life experiences.

Meditation 50min \$135

Discover the art of mindfulness and finding stillness within through the practice of meditation with a guided private session. By training the brain to become an observer of thought and learning to focus attention inward, you can invoke a deep sense of calm and a heightened sense of awareness. This session can be shared by two people for \$80 per person.

Personal Transformation 80min \$280

Discover the essential ingredients for real change and growth. Instead of replaying the same messages in your mind, your practitioner will help you find those places within yourself that are more resilient and kind. Grounded in techniques that form the 'how to' element of creating happiness and connecting to others, this holistic session can help address specific issues you may be experiencing in your life such as addiction, relationship difficulties, anxiety, grief or stress and is equally valuable for general non-specific matters you may just wish to discuss with someone.

Stress Management 80min \$280

Our bodies react to pressure by releasing a flood of stress hormones designed to create an emergency response. While these hormones are useful in helping us deal with challenging situations, they can have serious consequences on our health in the long-term. Gain a deeper understanding of the key stressors in your life and learn how to manage your responses to them more effectively. Your practitioner will recommend techniques to help you feel more in control and better able to cope with more clarity in times of stress.

The Journey \$185 per hour

This unique approach to emotional wellbeing is designed to uncover the root cause of whatever is preventing you from living a joyful life now. By accessing stored emotions and past experiences, your practitioner can help you transform your fear, anxiety, depression, low self-esteem, anger, physical illness and patterns of behaviour that are not serving you well. Unravel unhealthy beliefs that you have about yourself and release emotions that you may have been unable to express fully during influential experiences. Sessions average 90 - 110 minutes.

Gwinganna Equine Experiences

Working alongside horses provides wonderful insight into how we manage challenging situations in our lives. Horses, just as humans, are social creatures with expressed personalities, moods, mindsets and roles within their herds. Clear parallels between human and horse nature present considerable opportunity for metaphoric learning and deep growth in our personal awareness. No previous horse experience is necessary. Please note, you are required to wear closed toe shoes for these sessions.

Group Equine Assisted Learning approx. 180min \$210

In this practical and hands-on session working with one of our horses, you will learn more about your communication style and how effectively you set healthy boundaries in your life. Our equine assisted learning specialist will guide you through some of the simple elements of natural horsemanship (horse whispering) giving you a greater understanding of the importance of non-verbal communication and emotional intelligence. By participating in this experience, you will begin to recognise areas in your life that may need to be brought into balance. An exceptional session to improve communication and leadership skills, learn how to say 'no' effectively and build confidence and self-esteem. Please note, this runs in the morning affecting your participation in activities.

Equine Assisted Therapy 50min \$240 80min \$360

You will be working with one or more of our horses to help you explore and gain insight into patterns and behaviours that may be running without your conscious awareness. Your therapist will guide you through several different approaches with the horse and discuss what comes up in the moment. This is a unique session of self-discovery and self-awareness so you can be more conscious of beliefs and patterns that may no longer serve you well.

Equine Assisted Meditation 50min \$240

Horses have assisted human development for thousands of years and continue to do so today by teaching us how to be present in each moment. As a flight animal, their very survival depends upon this awareness and inner intuition. By observing and working with their intuitive intelligence, we can connect with our own. This unique way to meditate assists us to find the stillness and quiet within, begin noticing our reactive selves and connect more effectively with our responsive selves. Under the guidance and supervision of your therapist, you will work one-on-one with these magnificent creatures to find your own inner peace.

Equine Assisted Journey approx. 60min \$240 per hour

A very special way to explore your beliefs using The Journey. Combining the inner intelligence of horses with The Journey therapy, you will be guided to uncover the issues and blockages that can cause stress and anxiety in our lives. The very presence of the horse serves to support this path of inner reflection and clearing. For more information refer to The Journey.

We encourage you to speak with your therapist as your wellbeing is our priority, particularly if you have special needs or health conditions. Personal information shared is treated as highly confidential. Please advise your therapist if you wish to remain silent during your treatment.

Pregnancy Policy

To ensure the safety of both mother and child, we do not perform massage during the first trimester of pregnancy. More options are available from second trimester onwards, though there are some treatments that are unsuitable for the duration of pregnancy. Please ask your Spa and Wellness Advisor for more information.

Spa Etiquette

To ensure we can offer a calm and stress free environment within the retreat, we ask that you do not use any mobile devices in any guest areas including the spa and wellness areas. Please leave mobile devices in your room and speak with a quiet voice in treatment areas.
